DFW GARAGE APARTMENTS — SEO WEBSITE WIREFRAME

Domain: dfwgarageapartments.com **Powered by:** 6th Ave Homes **Purpose:** Pure SEO lead generation for garage apartment / ADU construction services in Dallas–Fort Worth **Build Tool:** Replit **Date:** March 31, 2026

STRATEGIC OVERVIEW

The Opportunity

There are ADU builders in DFW — Forge Legacy, Estate ADU, ADU Dallas (adudallas.com), Granite Peak Builders, Blackline Renovations, among others. But none of them own the niche online. Most are general contractors with a single ADU service page. ADU Dallas has an exact-match domain but only 3 pages and zero content depth. Forge Legacy has decent service page content but they're not niche-focused. Nobody has city-specific landing pages, in-depth resource guides, a cost calculator, or the kind of content strategy that dominates search results over time.

That's the gap. Not "nobody is doing this" — it's "nobody is doing this well." dfwgarageapartments.com will be the first dedicated, content-rich, SEO-optimized site focused exclusively on garage apartments and ADUs in the DFW metro. The competitors have doors. We're building a fortress.

The Domain Advantage

dfwgarageapartments.com is an exact-match domain for the highest-intent search queries in this niche. When someone Googles "DFW garage apartments," this domain signals immediate relevance — to both the searcher and Google. This is a significant competitive edge that most competitors cannot replicate.

The Two-Layer Strategy

Layer 1 — Conversion Pages (StoryBrand-informed) These are the core pages: Homepage, Services, Process, About, Contact. They exist to convert visitors once they arrive. They use clear, story-driven language. Customer is the hero. 6th Ave Homes is the guide. Clean CTAs on every section.

Layer 2 — SEO Content Pages (Search-first) These are the pages that attract visitors from Google. City-specific landing pages, cost guides, zoning guides, FAQ content, project showcases. Each page targets specific keywords people are actually searching. Each page funnels visitors into the conversion layer.

The Legislative Tailwind

Texas SB 673 passed the Senate in April 2025 but died in the House — the second time ADU legislation has failed at the state level. The bill would have prohibited municipalities from banning ADUs and mandated 60-day permit approval. It's widely expected to be reintroduced in the 2027 legislative session, and each attempt builds more public awareness and search interest around ADUs in Texas.

This matters for SEO because "Texas ADU laws" and "can I build an ADU in [city]" queries are climbing — and they spike every time a bill gets news coverage. This site should be the definitive resource for DFW homeowners searching these terms, regardless of whether the next bill passes. The content is evergreen: people want to know what's allowed in their city right now, not just what might change someday.

SITE ARCHITECTURE

Primary Navigation

DFW Garage Apartments [logo] Home | Services | Areas We Serve | Resources | About | Contact [Schedule a Consultation]

Note: "Areas We Serve" and "Resources" are dropdown menus that expose the SEO content layer without cluttering the main nav. This keeps the top-level experience clean (per StorySite philosophy) while giving Google a rich sitemap to crawl.

PAGE-BY-PAGE WIREFRAME

PAGE 1: HOMEPAGE (/)

Target Keywords: garage apartment builders DFW, ADU builders Dallas Fort Worth, garage apartments Dallas Fort Worth, build a garage apartment DFW, garage apartment builder near me, ADU contractor near me **Title Tag:** Garage Apartment Builders in Dallas–Fort Worth | DFW Garage Apartments **Meta Description:** Design and build your garage apartment with one team. DFW Garage Apartments handles design, permitting, and construction for homeowners across Dallas–Fort Worth. Schedule a free consultation. **Canonical:** https://dfwgarageapartments.com/

SECTION 1: HERO

StorySite Component: One Liner + Call to Action

H1: Garage Apartment Builders in Dallas–Fort Worth

Subheading: Design and build your garage apartment with one team — from first conversation to final walkthrough.

Supporting text (2-3 sentences): You’ve been thinking about adding a garage apartment. Maybe it’s for rental income, maybe it’s for family, maybe you just want your property to work harder. Whatever the reason, you shouldn’t have to hire five different people to make it happen.

Primary CTA: Schedule a Free Consultation **Secondary CTA:** See Our Work

SEO Notes: The H1 is the exact search query. The subheading contains “design and build” and “garage apartment” — both high-value phrases. The supporting text uses natural language that includes “rental income,” “garage apartment,” and “property” without stuffing.

SECTION 2: TRUST BAR

StorySite Component: Authority

Layout: Horizontal bar with 4 trust signals

- Powered by 6th Ave Homes
- One Team from Start to Finish
- Design + Construction + Lending
- Serving Dallas–Fort Worth Since 2016

SEO Notes: The trust bar establishes E-E-A-T (Experience, Expertise, Authoritativeness, Trustworthiness) signals that Google rewards in YMYL (Your Money Your Life) content. Including “Since 2016” and “Dallas–Fort Worth” adds local authority.

SECTION 3: PROBLEM

StorySite Component: Problem

H2: Most Garage Apartment Projects Fall Apart Before They Start

Body copy: You’ve seen the potential. An empty garage. Unused backyard space. A property that could do more.

But between zoning rules, design decisions, permit applications, finding a contractor, and figuring out what it’ll actually cost — most homeowners get stuck before they ever break ground.

It’s not because the project is impossible. It’s because the process is fragmented. You’re told to hire an architect, then find a builder, then navigate permits on your own, then hope everyone communicates.

That’s the old way. We built a better one.

SEO Notes: This section naturally includes “garage apartment,” “zoning,” “design,” “permit,” “contractor,” “cost,” and “homeowners” — all high-value terms. The conversational tone keeps it from reading like keyword stuffing.

SECTION 4: VALUE PROPOSITION / SERVICES

StorySite Component: Value Proposition + Solution/Services

H2: Garage Apartments Built for Real Life

Subheading: From garage conversions to full detached ADUs, we design and build spaces that actually work — for your property, your goals, and your budget.

Service Cards (4 cards, each links to service page):

Card 1: Garage Conversions Turn your existing garage into a fully livable space. One of the fastest and most cost-effective ways to add square footage. → Learn More

Card 2: Above-Garage Apartments Build a full apartment above your existing or new garage. Separate entrance, full kitchen and bath, designed for independence. → Learn More

Card 3: Detached ADUs A standalone structure on your property — designed from scratch, built to code, and tailored to your lot. → Learn More

Card 4: Guest Houses Whether it's for aging parents, visiting family, or long-term guests — a guest house adds flexibility and value to your property. → Learn More

CTA: Schedule a Consultation

SEO Notes: Each card targets a distinct keyword cluster (garage conversion, above-garage apartment, detached ADU, guest house) and links to a dedicated page. This creates internal link equity and topical depth.

SECTION 5: HOW IT WORKS

StorySite Component: How It Works / The Plan

H2: How We Build Garage Apartments in DFW

Step 1: Meet Up We start with your property, your goals, and what's realistic. We'll walk the site, talk through options, and give you a clear picture of what's possible — including cost ranges and timelines.

Step 2: Design + Plan We create a layout that fits your space, your budget, and your city's zoning requirements. You'll see the design before we break ground.

Step 3: Permits We handle the permit process. Every city in DFW has different rules for ADUs — setbacks, height limits, utility requirements. We know them. You don't have to.

Step 4: Build One team manages construction from foundation to finish. No juggling subcontractors. No communication gaps. Just a clear timeline and consistent updates.

Step 5: Move In Final walkthrough, keys in hand. Whether you're renting it out, moving family in, or just enjoying the extra space — it's ready.

CTA: Start Your Project

SEO Notes: The H2 "How We Build Garage Apartments in DFW" targets "how to build garage apartment DFW" queries directly. Each step description naturally includes keywords: "zoning requirements," "ADU," "setbacks," "height limits," "permit process," "subcontractors."

SECTION 6: WHY HOMEOWNERS BUILD

StorySite Component: Value Proposition (expanded)

H2: Why DFW Homeowners Are Adding Garage Apartments

Layout: 4 columns with icons

Create Rental Income Garage apartments in DFW rent for $1,200–$2,400/month. That's real money — often enough to cover a mortgage payment or fund the construction itself.

Add Flexible Living Space A separate space for aging parents, adult children, a home office, or guests. Built for independence but close enough to stay connected.

Increase Property Value A well-built garage apartment can add $100,000+ to your property value — often more than the cost of construction.

Plan for the Future Whether you need the space now or in five years, building it adds optionality to your property that you can't get any other way.

SEO Notes: This section targets the "why build a garage apartment" query cluster and includes specific dollar amounts ($1,200–$2,400/month, $100,000+) that make the content more valuable for featured snippets.

SECTION 7: PROJECTS / SOCIAL PROOF

StorySite Component: Testimonials + Authority

H2: Garage Apartment Projects in Dallas–Fort Worth

Layout: Image grid (3-4 projects) with city name and project type overlaid

- [Project photo] — Fort Worth | Garage Conversion
- [Project photo] — Dallas | Detached ADU
- [Project photo] — Arlington | Above-Garage Apartment
- [Project photo] — Plano | Guest House

CTA: See All Projects →

SEO Notes: Alt text on each image should include "[City] garage apartment" and project type. This targets Google Image Search, which is a significant traffic source for construction/renovation queries.

SECTION 8: AREAS WE SERVE

StorySite Component: N/A — Pure SEO section

H2: Garage Apartment Builders Across DFW

Body: Every city in Dallas–Fort Worth has different rules for garage apartments and ADUs. We know the zoning codes, permit requirements, and building regulations in each one — so your project doesn't get stuck in red tape.

Layout: Grid of city cards, each linking to the city-specific page:

Fort Worth | Dallas | Arlington | Plano | Frisco | Denton | McKinney | Southlake | Keller | Grapevine

SEO Notes: This is a pure internal linking section. Each city card creates a link to the city-specific landing page, distributing page authority across the site and signaling to Google that you have deep, localized expertise.

SECTION 9: THE STAKES

StorySite Component: The Stakes

H2: Don't Let Your Property Sit Underused

Body: Every month you wait is a month of rental income you're not collecting. It's a year of your parents not having a comfortable place to stay when they visit. It's equity you're not building.

The homeowners who move forward aren't the ones with the most money or the biggest lots. They're the ones who stop researching and start a conversation.

The worst outcome isn't building a garage apartment that doesn't work out. It's never building one at all.

CTA: Schedule a Free Consultation

SEO Notes: This section is conversion-focused. Light on keywords, heavy on emotional impact. Keeps the StoryBrand "Stakes" structure that creates urgency.

SECTION 10: LEAD MAGNET / CAPTURE CAMPAIGN

StorySite Component: Capture Campaign

H2: Free Guide: What Every DFW Homeowner Should Know Before Building a Garage Apartment

Body: Zoning basics, real cost ranges, timeline expectations, and the questions to ask before you hire anyone. No fluff, no sales pitch — just the stuff we wish every homeowner knew before they started.

CTA: Download the Free Guide → [Email capture form]

SEO Notes: The lead magnet serves dual purpose — email capture for nurture campaigns AND a signal to Google that this site provides authoritative, downloadable resources. The title is optimized for "what to know before building a garage apartment" queries.

SECTION 11: FOOTER / JUNK DRAWER

StorySite Component: Footer + Junk Drawer

Layout:

Column 1: DFW Garage Apartments Powered by 6th Ave Homes Fort Worth, TX [Phone] | [Email]

Column 2: Services - Garage Conversions - Above-Garage Apartments - Detached ADUs - Guest Houses

Column 3: Areas We Serve - Fort Worth - Dallas - Arlington - Plano - Frisco - + More

Column 4: Resources - Cost Guide - Zoning Guide - Texas ADU Laws - Financing Options - All Resources

Bottom bar: © 2026 DFW Garage Apartments | Powered by 6th Ave Homes | Privacy Policy | Sitemap

SEO Notes: Footer links create a second internal linking structure that supports crawlability. The sitemap link is essential for Google. Include schema markup for LocalBusiness in the footer code.

PAGE 2: SERVICES — GARAGE CONVERSIONS (/services/garage-conversions/)

Target Keywords: garage conversion Fort Worth, garage conversion Dallas, convert garage to apartment DFW, garage to living space Texas **Title Tag:** Garage Conversions in Dallas–Fort Worth | Turn Your Garage Into Living Space **Meta Description:** Convert your existing garage into a fully livable apartment, studio, or rental unit. DFW Garage

Apartments handles design, permits, and construction in Fort Worth, Dallas, and across DFW.

H1: Garage Conversions in Dallas–Fort Worth

Intro (2-3 paragraphs): A garage conversion is one of the fastest and most cost-effective ways to add livable square footage to your home. You already have the foundation, the walls, and the roof — we transform what's there into a space that actually works.

Whether you're converting a two-car garage into a studio apartment, a one-car garage into a home office, or a detached garage into a full rental unit, the process is simpler than most people expect. And because we handle design, permitting, and construction under one roof, there's no juggling multiple contractors.

Garage conversions in DFW typically range from $40,000 to $100,000 depending on the size, condition of the existing structure, plumbing and electrical needs, and the level of finish. We'll give you a realistic number before any work begins.

H2: What's Involved in a Garage Conversion

Content covering: structural assessment, insulation and climate control, plumbing and electrical, flooring, egress windows and fire safety (Fort Worth requires egress windows and smoke/CO detectors), HVAC, separate entrance options.

H2: Garage Conversion Zoning in DFW

Content covering: Fort Worth rules (must maintain equivalent garage space — important detail), Dallas restrictions (ADUO overlay or Board of Adjustment exception needed), how requirements vary by city. Link to the full Zoning Guide resource page.

H2: How Long Does a Garage Conversion Take?

Timeline overview: Planning (2-4 weeks), Permits (2-6 weeks depending on city), Construction (6-12 weeks). Total: 3-5 months typical.

H2: Is a Garage Conversion Worth It?

ROI analysis: cost vs. rental income potential, property value increase, comparison to other renovation types.

H2: Frequently Asked Questions About Garage Conversions

Q: Can I convert my garage to an apartment in Fort Worth? A: Yes. Fort Worth allows garage conversions, but you'll need to maintain the same amount of covered parking (or get a variance). You'll also need egress windows, smoke/CO detectors, and a building permit. We handle all of this.

Q: How much does a garage conversion cost in DFW? A: Most garage conversions in DFW run $40,000–$100,000 depending on size, plumbing/electrical needs, and finish level. We'll give you a realistic range at your first meeting.

Q: Do I need a permit to convert my garage? A: Yes — every city in DFW requires a building permit for garage conversions. The good news: we handle the permit process for you.

Q: How long does a garage conversion take? A: Typically 3-5 months from planning to completion. Construction itself is usually 6-12 weeks.

Q: Will a garage conversion increase my property value? A: In most cases, yes. A well-done garage conversion adds livable square footage, which directly increases assessed and market value. It also opens up rental income potential.

(Implement FAQ schema markup on these — each Q&A should be wrapped in FAQPage structured data for featured snippet eligibility)

CTA Section: Ready to Convert Your Garage? → Schedule a Free Consultation

Internal Links: Link to Cost Guide, Zoning Guide, relevant city pages, and Process page.

PAGE 3: SERVICES — ABOVE-GARAGE APARTMENTS (/services/above-garage-apartments/)

Target Keywords: above garage apartment DFW, garage apartment above garage Dallas, second story garage apartment Fort Worth, above garage living space near me **Title Tag:** Above-Garage Apartments in DFW | Second-Story Garage Living Space **Meta Description:** Build a full apartment above your garage in Dallas–Fort Worth. Separate entrance, full kitchen, full bath — designed for independence. One team handles everything.

H1: Above-Garage Apartments in Dallas–Fort Worth

Intro (2-3 paragraphs): An above-garage apartment gives you a fully independent living space without sacrificing any of your existing square footage. You keep your garage. You gain an apartment above it — with its own entrance, kitchen, bathroom, and living area.

This is one of the most popular garage apartment types in DFW because it checks every box: rental income potential, guest space, multi-generational living, and a property value bump — all without reducing your current usable space. And because the garage below already provides the foundation and structural support, construction costs are often lower than a fully detached build.

Above-garage apartments in DFW typically range from $80,000 to $200,000 depending on size, structural upgrades needed, finish level, and whether you're building above an existing garage or constructing a new garage-and-apartment structure together.

H2: What an Above-Garage Apartment Includes

Content covering: separate exterior staircase or interior access options, full kitchen and bathroom, bedroom/living area layout options, HVAC (separate system recommended), electrical panel (separate meter option), fire separation requirements between garage and apartment (1-hour fire-rated assembly), soundproofing considerations, separate entrance design.

H2: Structural Requirements for Building Above a Garage

Content covering: existing garage foundation assessment (can it support a second story?), load-bearing wall evaluation, roof removal and reframing, header and beam upgrades, when it's smarter to demo and rebuild vs. build on top, engineering stamp requirements.

H2: Above-Garage Apartment Zoning in DFW

Content covering: how zoning differs from garage conversions (height limits become critical), Fort Worth height maximums, Dallas overlay requirements, setback considerations when adding height. Link to the full Zoning Guide.

H2: How Long Does an Above-Garage Apartment Take?

Timeline: Design (3-6 weeks), Permits (3-8 weeks depending on city), Construction (10-16 weeks). Total: 4-7 months typical.

H2: Is an Above-Garage Apartment Worth It?

ROI analysis: cost vs. rental income ($1,400–$2,200/month typical in DFW), property value increase, comparison to garage conversion and detached ADU.

H2: Frequently Asked Questions About Above-Garage Apartments

Q: Can I build an apartment above my existing garage? A: In many cases, yes — but it depends on the structural integrity of your current garage's foundation and framing. We do a structural assessment during our first visit to determine what's feasible.

Q: How much does an above-garage apartment cost in DFW? A: Most above-garage apartments in DFW run $80,000–$200,000. Building above an existing garage is typically less than constructing a brand-new two-story garage-and-apartment structure.

Q: Do I need separate utilities for an above-garage apartment? A: It depends on your city and your plans. Separate meters make sense for rental units. We help you determine what's required and what's smart for your situation.

Q: Is it cheaper to convert a garage or build above it? A: Garage conversions are usually cheaper ($40K–$100K) because you're working within an existing structure. Above-garage apartments cost more ($80K–$200K) but you keep your garage and gain more square footage.

Q: What's the fire code for an apartment above a garage? A: Texas and most DFW cities require a 1-hour fire-rated assembly between the garage and the living space above. This includes fire-rated drywall, sealed penetrations, and a self-closing fire-rated door if there's interior access.

(Implement FAQ schema markup — wrap each Q&A in FAQPage structured data)

CTA Section: Ready to Build Above Your Garage? → Schedule a Free Consultation

Internal Links: Link to Cost Guide, Zoning Guide, relevant city pages, Garage Conversion page (comparison angle), and Process page.

PAGE 4: SERVICES — DETACHED ADUs (/services/detached-adus/)

Target Keywords: detached ADU builders DFW, accessory dwelling unit Dallas, ADU construction Fort Worth, backyard ADU DFW, ADU builder near me **Title Tag:** Detached ADU Builders in Dallas–Fort Worth | Custom Backyard Living **Meta Description:** Build a detached ADU on your property in DFW. Custom design, full permitting, and construction from one team. Serving Fort Worth, Dallas, and surrounding cities.

H1: Detached ADU Builders in Dallas–Fort Worth

Intro (2-3 paragraphs): A detached ADU is a standalone structure on your property — designed from scratch, built from the ground up, and completely separate from your main home. It's the most flexible option for homeowners who want a true independent living space on their lot.

Because it's a new build, a detached ADU gives you total control over the design: layout, size, placement on the lot, finishes, and how the space connects (or doesn't) to your primary home. It's also the best option for lots where the existing garage can't be converted or built upon.

Detached ADUs in DFW typically range from $100,000 to $300,000+ depending on size, design complexity, site conditions (slope, access, utility proximity), and finish level. Larger or premium builds can go higher, but most DFW projects fall in this range.

H2: What Goes Into Building a Detached ADU

Content covering: site survey and placement planning, foundation (slab vs. pier and beam), framing and structure, full MEP (mechanical/electrical/plumbing), HVAC system, separate utility connections, exterior design (must match or complement primary dwelling per most DFW city codes), interior finish options, landscaping and site restoration.

H2: Lot Requirements for a Detached ADU in DFW

Content covering: minimum lot size requirements (varies by city — Plano requires X, Fort Worth requires Y), setback rules (how far from property lines, main dwelling, and other structures), lot coverage maximums, easement and utility line considerations, survey requirements.

H2: Detached ADU Zoning in DFW

Content covering: which cities allow detached ADUs by-right vs. special exception, size limits by city (e.g., Denton: 800 sq ft or 75% of primary dwelling), owner-occupancy rules, whether short-term rental is allowed. Link to full Zoning Guide.

H2: How Long Does It Take to Build a Detached ADU?

Timeline: Design (4-8 weeks), Permits (4-10 weeks), Site Prep + Construction (12-20 weeks). Total: 5-9 months typical.

H2: Is a Detached ADU a Good Investment?

ROI analysis: highest rental income potential of any ADU type ($1,600–$2,400/month in DFW), strongest property value increase, longest payback period but highest long-term return. Comparison to conversion and above-garage options.

H2: Frequently Asked Questions About Detached ADUs

Q: What's the difference between an ADU and a guest house? A: Functionally, they're similar — both are separate living spaces on your property. "ADU" (Accessory Dwelling Unit) is the legal/zoning term. "Guest house" is the lifestyle term. Zoning rules apply to both.

Q: How much does a detached ADU cost in DFW? A: Most detached ADUs in DFW cost $100,000–$300,000 depending on size, site conditions, and finish level. It's a ground-up build, so costs are higher than conversions but you get a brand-new, purpose-built structure.

Q: What size ADU can I build on my property? A: It depends on your city and lot size. Denton allows up to 800 sq ft or 75% of primary dwelling. Plano allows 400–1,100 sq ft. Fort Worth varies by zoning district. We research your specific property before design begins.

Q: Do I need separate utilities for a detached ADU? A: Most cities require or strongly recommend separate utility connections for detached structures. This includes water, sewer, electrical, and gas. Some cities allow shared meters; others require separate. We handle this during the design phase.

Q: Can I put an ADU anywhere on my lot? A: No — setback rules dictate how close to property lines, the main house, and other structures the ADU can be. Placement also depends on utility access, drainage, and tree preservation requirements. We factor all of this into the site plan.

(Implement FAQ schema markup)

CTA Section: Ready to Build a Detached ADU? → Schedule a Free Consultation

Internal Links: Link to Cost Guide, Zoning Guide, city pages, Guest House page (comparison), and Process page.

PAGE 5: SERVICES — GUEST HOUSES (/services/guest-houses/)

Target Keywords: guest house builders DFW, build guest house Fort Worth, mother-in-law suite Dallas, casita builder DFW, mother in law suite builder near me **Title Tag:** Guest House Builders in Dallas–Fort Worth | Mother-in-Law Suites & Casitas **Meta Description:** Design and build a custom guest house on your property in DFW. Perfect for aging parents, extended family, or guests. One team, start to finish.

H1: Guest House Builders in Dallas–Fort Worth

Intro (2-3 paragraphs): A guest house gives your family something most homes can't: a separate, comfortable living space — right on your property. Whether it's for aging parents who want to stay close but independent, adult children transitioning between life stages, or long-term guests who deserve more than a pull-out couch, a guest house adds a level of flexibility that no spare bedroom can match.

We build guest houses as detached structures, above-garage apartments, and garage conversions — depending on your property, your lot, and what makes the most sense for how you'll use the space. The key difference between a "guest house" and an "ADU" is really about intent: guest houses are typically designed with family in mind, which means different priorities — accessibility, privacy, proximity, and comfort over maximizing rental income.

Guest houses in DFW range from $80,000 (garage conversion for a simple studio) to $250,000+ (detached custom build with ADA-accessible features and premium finishes). The cost depends on structure type, size, accessibility requirements, and design complexity.

H2: Designing a Guest House for Multi-Generational Living

Content covering: ADA-accessible design options (zero-step entry, wider doorways, walk-in showers, grab bars), single-story preference for aging parents, kitchen and bathroom placement for ease of use, connection to main house (covered walkway, shared courtyard, or fully separate), emergency access considerations, privacy vs. proximity balance.

H2: Guest House vs. ADU: What's the Difference?

Content covering: from a zoning and permitting standpoint, they're the same thing. The difference is intent and design priority. Guest houses emphasize comfort, accessibility, and family connection. ADUs optimize for rental income and independence. Many homeowners build a guest house now and rent it later — or vice versa. Link to Comparison resource page.

H2: Guest House Zoning and Permits in DFW

Content covering: same zoning rules as ADUs (guest houses ARE ADUs legally), how cities treat owner-occupied vs. rental use, specific considerations for ADA modifications (no special zoning, but building code implications). Link to Zoning Guide.

H2: How Long Does It Take to Build a Guest House?

Timeline depends on type: Garage conversion (3-5 months), Above-garage (4-7 months), Detached new build (5-9 months). Include note about ADA modifications adding 1-2 weeks to design phase.

H2: Is a Guest House Worth the Investment?

ROI analysis: even if you never rent it, a guest house adds $80K–$150K+ in property value, avoids the cost of assisted living ($4,000–$8,000/month in DFW), and keeps family close. If you ever do decide to rent it, you have that optionality built in.

H2: Frequently Asked Questions About Guest Houses

Q: Can I build a guest house for my aging parents in DFW? A: Yes. We design guest houses specifically for multi-generational living — with accessibility features, single-story layouts, and designs that keep family close while preserving independence.

Q: How much does a guest house cost in DFW? A: It depends on the type of build. A garage conversion for a guest suite runs $40K–$100K. A detached guest house runs $100K–$250K+. We'll give you a realistic range at your first meeting.

Q: Does a guest house need a separate entrance? A: Most cities require a separate entrance for any ADU/guest house. This is actually a feature, not a restriction — it gives your family member or guest privacy and independence.

Q: Can I make a guest house ADA accessible? A: Absolutely. We can design for zero-step entry, 36" doorways, roll-in showers, grab bars, lower countertops, and other accessibility features. We do this frequently for aging-in-place builds.

Q: Can I convert a guest house to a rental later? A: Yes — as long as it meets the ADU zoning requirements for your city (which it will, since we build to those standards). You just need to check owner-occupancy rules in your city before listing it as a rental.

(Implement FAQ schema markup)

CTA Section: Ready to Build a Guest House? → Schedule a Free Consultation

Internal Links: Link to Cost Guide, Zoning Guide, city pages, Detached ADU page (comparison), Comparison resource page, and Process page.

PAGE 6: PROCESS (/process/)

Target Keywords: how to build garage apartment DFW, garage apartment process, ADU construction process Texas **Title Tag:** Our Process | How We Build Garage Apartments in DFW **Meta Description:** From first conversation to final walkthrough — here's exactly how we design and build garage apartments in Dallas–Fort Worth. Clear steps, no surprises.

H1: How to Build a Garage Apartment in DFW

Expanded 5-step process (same as homepage but with much more detail per step):

Step 1: Meet Up — We Start With Your Property and Your Goals (3-4 paragraphs about what happens in the initial meeting: site visit, goal discussion, feasibility assessment, preliminary budget conversation)

Step 2: Design — We Create a Layout That Fits Your Space and Budget (Detail about the design process: floor plans, material selections, design revisions, how zoning constraints inform design)

Step 3: Permits — We Navigate the Red Tape So You Don't Have To (Detail about permit process by city, typical timelines, what can cause delays, how 6AH handles it)

Step 4: Construction — One Team, Clear Timeline, Consistent Updates (Detail about construction management, typical build timelines, how communication works, cost-plus billing transparency)

Step 5: Completion — Final Walkthrough and Handoff (What to expect at completion, warranty information, what happens next)

CTA: Start Your Garage Apartment Project → Schedule a Consultation

PAGES 7-14: CITY-SPECIFIC LANDING PAGES (/areas/[city]/)

These are the highest-leverage SEO pages on the entire site. Each one targets "[service] + [city]" queries that no competitor is currently owning.

Template Structure for Every City Page:

Title Tag: Garage Apartment Builders in [City], TX | DFW Garage Apartments **Meta Description:** Build a garage apartment in [City], Texas. We handle design, zoning, permits, and construction. One team from start to finish. Schedule a free consultation.

H1: Garage Apartment Builders in [City], Texas

Intro paragraph mentioning city by name, the types of projects common in that area, and the city's general stance on ADUs.

H2: ADU and Garage Apartment Zoning in [City] City-specific zoning information: what's allowed, lot size requirements, setbacks, height limits, owner-occupancy rules, permit authority and contact info.

H2: What Does a Garage Apartment Cost in [City]? City-specific cost context: labor market, lot sizes typical in the area, common project types.

H2: Popular Garage Apartment Projects in [City] What types of builds are most common in this city and why. Link to relevant project pages if available.

H2: Why [City] Homeowners Are Building Garage Apartments Local angle: rental market data for that city, property value trends, demographic factors (college town, growing families, aging population, etc.)

H2: Frequently Asked Questions About Garage Apartments in [City]

Every city page MUST have 5-6 FAQs with FAQ schema markup. These target "People Also Ask" featured snippets — one of the highest-leverage SEO plays available. Each city gets unique questions based on its specific regulations.

Example FAQs for any city page: - Can I build a garage apartment in [City], TX? - How much does a garage apartment cost in [City]? - Do I need a permit for a garage apartment in [City]? - Can I rent out a garage apartment in [City]? - What are the ADU zoning rules in [City]? - How long does it take to build a garage apartment in [City]?

(These MUST be answered with city-specific information, not generic copy. That's what makes them rank.)

CTA Section: Ready to Build in [City]? → Schedule a Consultation

---

City Page 7: Fort Worth (/areas/fort-worth/)

Unique content angles: - Fort Worth is one of the most ADU-friendly cities in DFW - No owner-occupancy requirement - Strong rental market in Near Southside, Fairmount, Arlington Heights, TCU area - 6th Ave Homes' home market — deepest expertise here - Reference specific neighborhoods where garage apartments are common - Mention Fort Worth's forward-thinking approach to ADU regulation

---

City Page 8: Dallas (/areas/dallas/)

Unique content angles: - Dallas is currently MORE RESTRICTIVE than Fort Worth - Requires Accessory Dwelling Unit Overlay (ADUO) or Board of Adjustment exception - $600 filing fee for Board exception - ForwardDallas plan proposed city-wide "by right" ADUs — was defeated in 2024 but shows momentum - SB 673 (2025) would have overridden Dallas restrictions — it died in the House but is expected to be reintroduced in 2027 - Worth noting which Dallas neighborhoods have ADUO or are ADU-friendly - Target: "ADU Dallas" and "can I build ADU in Dallas"

City Page 9: Arlington (/areas/arlington/)

Unique content angles: - UTA (University of Texas at Arlington) creates strong rental demand - Family-oriented city with aging-in-place opportunities - Research specific ADU regulations for Arlington

---

City Page 10: Plano (/areas/plano/)

Unique content angles: - Plano has a “Backyard Cottage” program — ADUs allowed 400-1,100 sq ft - Multiple ADUs per lot permitted (standard + JADU) - High property values make ROI compelling - Corporate relocations create rental demand

---

City Page 11: Frisco (/areas/frisco/)

Unique content angles: - Garage apartments allowed (attached to garage, above or side-by-side) - Owner-occupancy requirement to rent - Must match main dwelling exterior materials - Fastest-growing city in DFW — massive demand

---

City Page 12: Denton (/areas/denton/)

Unique content angles: - Denton is the MOST PERMISSIVE city in North Texas for ADUs - One ADU per lot, max 800 sq ft or 75% of primary dwelling - No owner-occupancy requirement - UNT and TWU create enormous rental demand - Separate utilities allowed but not required

---

City Page 13: McKinney (/areas/mckinney/)

Unique content angles: - Chapter 146 addresses accessory buildings - Historic downtown area offers unique ADU opportunities - Growing city with increasing housing demand - Research specific regulations

---

City Page 14: Southlake (/areas/southlake/)

Unique content angles: - High-end market: luxury ADUs and guest houses - Larger lots accommodate detached structures - High property values justify premium builds - Position as “luxury garage apartments” and “estate guest houses”

PAGES 15-20: RESOURCE / GUIDE PAGES (/resources/[slug]/)

These pages are the SEO engine. They target informational queries with long-form, high-value content that establishes topical authority. Each page should be 1,500-2,500 words minimum.

Resource Page 15: How Much Does a Garage Apartment Cost in DFW? (/resources/garage-apartment-cost-dfw/)

Target Keywords: garage apartment cost DFW, how much does garage apartment cost Texas, ADU cost Dallas Fort Worth, garage conversion cost **Title Tag:** How Much Does a Garage Apartment Cost in DFW? (2026 Guide) **Meta Description:** Real cost ranges for building a garage apartment in Dallas–Fort Worth. Garage conversions, above-garage apartments, and detached ADUs — what to expect and what drives the price.

H1: How Much Does a Garage Apartment Cost in Dallas–Fort Worth?

Content outline:

H2: Garage Apartment Cost Ranges in DFW - Garage conversion: $40,000–$100,000 - Above-garage apartment: $80,000–$200,000 - Detached ADU (new build): $100,000–$300,000+ - Cost per square foot: $150–$350 depending on finish level

H2: What Drives the Cost of a Garage Apartment? - Size of the space - New build vs. conversion - Plumbing and electrical work - Foundation requirements - Design and finish level - Site conditions (access, slope, utilities) - City permit fees

H2: Garage Apartment Cost by City - Fort Worth, Dallas, Plano, Frisco, Denton (with notes on permit costs, labor market)

H2: How to Budget for a Garage Apartment Project - Getting realistic about total cost (construction + permits + design + contingency) - Cost-plus vs. fixed bid (explain 6AH's cost-plus model) - Financing options overview (link to financing guide)

H2: Is a Garage Apartment a Good Investment? - Rental income potential ($1,200–$2,400/month in DFW) - Property value increase - Payback period calculation - Comparison to other home improvements

H2: Get a Realistic Estimate for Your Project CTA → Schedule a consultation for a site-specific cost conversation

---

Resource Page 16: ADU Zoning Guide by City (/resources/adu-zoning-guide-dfw/)

Target Keywords: ADU zoning DFW, garage apartment zoning Fort Worth, ADU rules Dallas, can I build ADU Texas **Title Tag:** ADU Zoning Guide: DFW City-by-City Rules (2026) | DFW Garage Apartments **Meta Description:** Complete ADU and garage apartment zoning guide for every major city in Dallas–Fort Worth. What's allowed, lot requirements, setbacks, permits, and owner-occupancy rules.

H1: ADU Zoning Guide for Dallas–Fort Worth: City-by-City Rules

Content outline:

H2: Understanding ADU Zoning in Texas - What zoning means for your project - The difference between “by right” and “special exception” - How statewide ADU legislation could change the landscape (link to Texas ADU Laws guide)

H2: Fort Worth ADU Zoning H2: Dallas ADU Zoning H2: Plano ADU Zoning H2: Frisco ADU Zoning H2: Denton ADU Zoning H2: Arlington ADU Zoning H2: McKinney ADU Zoning (Each with specific details: what’s allowed, size limits, setbacks, height, owner-occupancy, permit contact info)

H2: Which DFW Cities Are Most ADU-Friendly? - Ranking with explanation - Denton #1, Fort Worth #2, Plano #3…

H2: Not Sure What’s Allowed on Your Property? CTA → Schedule a consultation — we’ll research your specific lot and city

SEO Notes: This is the “pillar page” for zoning content. Each city section links to the corresponding city landing page. Target featured snippets by formatting city rules as structured data (tables or definition lists).

Resource Page 17: Texas ADU Laws — What Homeowners Need to Know (/resources/texas-adu-laws/)

Target Keywords: Texas ADU law, ADU legal Texas, Texas ADU regulations 2026, ADU legislation Texas, can I build ADU Texas **Title Tag:** Texas ADU Laws: What DFW Homeowners Need to Know (2026 Update) **Meta Description:** Current ADU laws in Texas and DFW — what’s allowed, what’s not, and what’s changing. City-by-city rules for Dallas, Fort Worth, and surrounding cities.

H1: Texas ADU Laws: What DFW Homeowners Need to Know

Content outline:

H2: Can You Build an ADU in Texas? - Yes — but it depends entirely on your city. Texas has no statewide ADU law (yet). Each city sets its own rules. - This is different from California, Oregon, and other states that have passed statewide ADU legislation. - Bottom line: your city’s zoning code determines what you can and can’t build. Link to Zoning Guide.

H2: Current ADU Rules in DFW (City-by-City Summary) - Quick-reference table: City | Allowed? | Key Restrictions | Owner-Occupancy? | Max Size - Fort Worth: Yes, relatively permissive - Dallas: Only in ADUO overlay neighborhoods or by Board of Adjustment exception ($600 filing fee) - Denton: Most permissive in North Texas (up to 800 sq ft, no owner-occupancy requirement) - Plano: “Backyard Cottage” program, 400-1,100 sq ft - Frisco: Allowed but owner-occupancy required to rent - Link each city to its dedicated city page for full details

H2: The Push for Statewide ADU Legislation in Texas - SB 673 (2025): Passed the Texas Senate in April 2025, would have prohibited municipal ADU bans and mandated 60-day permits. Died in the House. Second time ADU legislation has failed at the state level. - HB

878 (2025): Companion bill, also did not pass. - The pattern: each session builds momentum. Widely expected to be reintroduced in the 2027 legislative session. - What would change if a statewide law passes: Dallas restrictions would be overridden, owner-occupancy mandates removed, permit timelines shortened.

H2: What This Means for You Right Now - You don't have to wait for legislation. Many DFW cities already allow ADUs. - If your city currently restricts ADUs, options include: Board of Adjustment exception (Dallas), petitioning for ADUO overlay, building a structure that meets existing accessory building codes. - If your city allows ADUs, there's no reason to delay — build while you're ahead of the curve.

H2: How to Stay Updated on Texas ADU Laws - Bookmark this page (we update it as legislation progresses) - Sign up for our newsletter - Follow us on social media for real-time updates

H2: Ready to Find Out What's Allowed on Your Property? CTA → Schedule a consultation — we'll research your specific lot and city's current rules

SEO Notes: This page is designed to be evergreen — it captures "Texas ADU laws" queries regardless of legislative status. The SB 673 history adds depth and authority. Update the legislation section whenever new bills are introduced (next opportunity: 2027 session). The city-by-city summary table is designed for featured snippets.

Resource Page 18: Garage Apartment vs. Detached ADU (/resources/garage-apartment-vs-detached-adu/)

Target Keywords: garage apartment vs ADU, garage conversion vs detached ADU, ADU types comparison **Title Tag:** Garage Apartment vs. Detached ADU: Which Is Right for Your DFW Property? **Meta Description:** Comparing garage apartments and detached ADUs — cost, timeline, zoning, and what works best for different properties in Dallas–Fort Worth.

Content: Side-by-side comparison covering cost, timeline, zoning requirements, design flexibility, rental income potential, property value impact. Include a "which is right for you" decision framework.

Resource Page 19: Can You Rent Out a Garage Apartment in Texas? (/resources/rental-income-garage-apartment-texas/)

Target Keywords: rent garage apartment Texas, garage apartment rental income DFW, ADU rental income Texas **Title Tag:** Can You Rent Out a Garage Apartment in Texas? | Rental Income Guide **Meta Description:** Yes — and here's how much DFW homeowners are earning. Rental income ranges, legal requirements, tax implications, and how to maximize your ROI.

Content: Legal requirements by city, rental income data for DFW ($1,200–$2,400/month), tax implications, property management considerations, Airbnb vs. long-term rental analysis.

Resource Page 20: How to Finance a Garage Apartment (/resources/how-to-finance-garage-apartment/)

Target Keywords: finance garage apartment, ADU loan Texas, construction loan ADU, HELOC for garage apartment **Title Tag:** How to Finance a Garage Apartment in DFW | Financing Options Guide **Meta Description:** HELOC, construction loans, cash-out refinance, and other ways to fund your garage apartment project in Dallas–Fort Worth. Pros, cons, and what lenders look for.

Content: Financing options (HELOC, construction loan, cash-out refi, personal loan, 6th Ave Lending), comparison table, what lenders look for, how to get pre-approved, typical interest rates and terms.

SEO Notes: This naturally links to 6th Ave Lending as a resource — subtle cross-sell without being salesy.

PAGE 21: PROJECTS (/projects/)

Target Keywords: garage apartment projects DFW, ADU gallery Dallas Fort Worth **Title Tag:** Our Garage Apartment Projects | DFW Garage Apartments **Meta Description:** See real garage apartment projects we've completed across Dallas–Fort Worth. Garage conversions, detached ADUs, above-garage apartments, and guest houses.

H1: Garage Apartment Projects in Dallas–Fort Worth

Layout: Filterable image grid - Filter by: City | Project Type (Conversion, Above-Garage, Detached, Guest House) - Each project card shows: Hero image, City, Project Type, Size

Individual project pages should include: - 4-8 photos - City and neighborhood - Project type - Square footage - Scope of work (2-3 sentences) - Timeline - (If possible) What the homeowner wanted and how we delivered

SEO Notes: Each project page creates unique, localized content. Alt text on all images should include city + project type. These pages also feed Google Image Search results.

PAGE 22: ABOUT (/about/)

Target Keywords: 6th Ave Homes, garage apartment builder Fort Worth, about DFW garage apartments **Title Tag:** About Us | Powered by 6th Ave Homes | DFW Garage Apartments **Meta Description:** DFW Garage Apartments is powered by 6th Ave Homes —

a Fort Worth-based real estate, design, and construction company helping homeowners since 2016.

StorySite Component: Mini Customer Story → Your Story → What Makes Us Different

H1: Powered by 6th Ave Homes

Mini Customer Story (2-3 sentences): You want to add a garage apartment to your property, but the process feels complicated and you're not sure where to start. You deserve a team that gets it — one that handles design, permitting, and construction so you don't have to manage five different companies. That's why we created DFW Garage Apartments.

Your Story (3-4 paragraphs): DFW Garage Apartments is powered by 6th Ave Homes, a Fort Worth-based real estate, design, and construction company founded by Jamey Ice and Jimmy Williams in 2016.

What started with flipping historic homes in the Fairmount neighborhood has grown into a full one-stop-shop — brokerage, design, construction, and lending — serving homeowners across Dallas–Fort Worth. We've helped thousands of families find and create homes that feel like them.

We built DFW Garage Apartments because we kept getting the same call: homeowners who wanted to add space to their property but didn't know where to start, who to hire, or how to navigate the process. We knew we could help — because we already had the design team, the construction team, and the local expertise under one roof.

This site exists to make the process simpler. Whether you're exploring the idea or ready to break ground, we're here to help you figure out what makes sense for your property.

H2: What Makes Us Different - One team from start to finish (design, permits, construction) - Strong focus on design (spaces with soul, not cookie-cutter boxes) - Clear and simple process - Local experience across DFW (Fort Worth, Dallas, and surrounding cities) - Cost-plus pricing transparency - 120+ five-star Google reviews

CTA: Work With Our Team → Schedule a Consultation

PAGE 23: CONTACT (/contact/)

Target Keywords: garage apartment consultation DFW, contact garage apartment builder **Title Tag:** Start Your Garage Apartment Project | Contact DFW Garage Apartments **Meta Description:** Ready to build a garage apartment in DFW? Tell us about your property and we'll help you figure out the next step. Free consultation — no obligation.

H1: Start Your Garage Apartment Project

Body: Tell us a little about your property and what you're thinking. We'll reach out to schedule a conversation and help you figure out the next step — no pressure, no obligation.

Form Fields: - Name - Email - Phone - Property Address - City (dropdown — Fort Worth, Dallas, Arlington, Plano, Frisco, Denton, McKinney, Other) - Project Type (dropdown — Garage Conversion, Above-Garage Apartment, Detached ADU, Guest House, Not Sure Yet) - What are you hoping to use the space for? (dropdown — Rental Income, Family/Aging Parents, Guest Space, Home Office, Not Sure Yet) - Anything else you want us to know? (textarea)

Below form: Or call us at [phone number]. We're based in Fort Worth and serve the entire DFW metro.

SEO Notes: The form dropdowns double as data collection for understanding your lead pipeline AND as structured content that signals to Google what this page is about. The "City" dropdown reinforces local coverage.

PAGE 24: SERVICES INDEX (/services/)

Target Keywords: garage apartment services DFW, ADU services Dallas Fort Worth **Title Tag:** Garage Apartment Services in DFW | Conversions, ADUs, Guest Houses **Meta Description:** Full-service garage apartment and ADU construction in Dallas–Fort Worth. Garage conversions, above-garage apartments, detached ADUs, and guest houses — one team, start to finish.

H1: Garage Apartment Services in Dallas–Fort Worth

Intro (2-3 sentences): Every property is different, and every homeowner's goals are unique. That's why we offer four distinct types of garage apartment builds — each designed, permitted, and constructed by one team.

Layout: 4 service cards in a 2x2 grid (same as homepage Section 4, but larger with more detail):

Each card includes: Service image, H2 title, 2-3 sentence description, bullet list of 3-4 key points, "Learn More →" link to service page.

Below cards — comparison table:

Feature	Garage Conversion	Above-Garage	Detached ADU	Guest House
Cost Range	$40K–$100K	$80K–$200K	$100K–$300K+	$80K–$250K+
Timeline	3-5 months	4-7 months	5-9 months	3-9 months
Keep Garage?	No	Yes	N/A	Depends
Best For	Budget, speed	Space + garage	Full flexibility	Family

CTA: Not Sure Which Is Right? → Schedule a Consultation

PAGE 25: AREAS INDEX (/areas/)

Target Keywords: garage apartment builders near me, ADU builders DFW cities, garage apartment construction DFW metro **Title Tag:** Areas We Serve | Garage Apartment Builders Across DFW **Meta Description:** We build garage apartments across Dallas–Fort Worth. Fort Worth, Dallas, Arlington, Plano, Frisco, Denton, McKinney, Southlake, and more. Find your city.

H1: Garage Apartment Builders Across Dallas–Fort Worth

Intro (2-3 sentences): Every city in DFW has different rules for garage apartments and ADUs — different zoning, different setbacks, different permit processes. We know the regulations in each one, which means your project doesn't get stuck in red tape.

Layout: City card grid (8-10 cities). Each card includes: City name, brief one-liner (e.g., "One of DFW's most ADU-friendly cities"), link to city page.

Below grid: H2: Don't See Your City? We serve the entire DFW metro. If your city isn't listed, we can still help — just reach out and we'll research the zoning and feasibility for your specific property.

CTA: Contact Us About Your City →

PAGE 26: BLOG INDEX (/blog/)

Target Keywords: garage apartment blog, ADU tips DFW, garage apartment advice Texas **Title Tag:** Blog | Garage Apartment Tips, Guides & DFW News | DFW Garage Apartments **Meta Description:** Tips, guides, and news about building garage apartments and ADUs in Dallas–Fort Worth. Zoning updates, cost breakdowns, project stories, and expert advice.

H1: Garage Apartment Blog

Layout: Blog listing page with: - Featured/latest post at top (large card with image, title, excerpt, date) - Below: grid of post cards (3 columns desktop, 1 column mobile) - Each card: Featured image, title, excerpt (first 150 characters), date, category tag - Sidebar or top: Category filter (Zoning, Costs, Projects, Tips, Legislation) - Pagination at bottom (12 posts per page)

BLOG POST TEMPLATE (/blog/[slug]/)

Layout for every blog post:

- Breadcrumb: Home > Blog > [Post Title]
- H1: [Post Title]
- Author line: "By Jamey Ice / 6th Ave Homes Team" + publish date
- Category tag(s)

- Table of Contents (auto-generated from H2s, for posts over 1,000 words — sticky sidebar on desktop, collapsible on mobile)
- Body content (H2s, H3s, paragraphs, images)
- CTA banner after the final section: "Ready to start your garage apartment project?" → Schedule Consultation
- Related Posts section: 3 post cards (algorithmically selected by matching category tags)
- Lead magnet banner: "Download our free DFW Garage Apartment Guide" → email capture

Structured Data: Article schema + Author schema (for E-E-A-T):

```
{
  "@context": "https://schema.org",
  "@type": "Article",
  "headline": "[Post Title]",
  "author": { "@type": "Person", "name": "Jamey Ice" },
  "publisher": { "@type": "Organization", "name": "DFW Garage Apartments" },
  "datePublished": "[Date]",
  "dateModified": "[Date]"
}
```

PROJECT PAGE TEMPLATE (/projects/[slug]/)

Layout for every project page:

- Breadcrumb: Home > Projects > [Project Name]
- H1: [Project Type] in [City], TX
- Project info bar: City | Project Type | Size (sq ft) | Timeline | Year Completed
- Photo gallery: 4-8 images (lightbox on click, swipeable on mobile)
- H2: The Project
  - 2-3 paragraphs: What the homeowner wanted, challenges, how we approached it, what makes this build unique
- H2: Scope of Work
  - Bullet list of what was included (design, permits, foundation, framing, MEP, finishes, etc.)
- H2: Build Details
  - Square footage, number of rooms, key features (e.g., "separate entrance," "ADA accessible," "full kitchen")
- CTA: "Want Something Similar?" → Schedule a Consultation
- Related Projects: 2-3 other project cards from same city or same project type

SEO Notes: Alt text on all images: "[City] [project type] by DFW Garage Apartments." Title tag: "[Project Type] in [City] | DFW Garage Apartments." Each project page creates unique, localized content that targets "[project type] [city]" image search queries.

TECHNICAL SEO SPECIFICATIONS

For Replit Build

Framework: Next.js or Astro recommended (both are SSR-friendly, which is essential for SEO). Avoid pure client-side React — Google needs server-rendered HTML.

Performance: - Target Lighthouse score of 90+ across all Core Web Vitals - Lazy-load images below the fold - Compress all images (WebP format preferred) - Minimize JavaScript bundle size - Use static generation for resource/guide pages (they don't change often)

Structured Data (JSON-LD) — implement on every page:

```
// LocalBusiness schema (site-wide, in footer)
{
  "@context": "https://schema.org",
  "@type": "HomeAndConstructionBusiness",
  "name": "DFW Garage Apartments",
  "description": "Garage apartment and ADU design and construction in Dallas–Fort Worth",
  "url": "https://dfwgarageapartments.com",
  "telephone": "[PHONE]",
  "address": {
    "@type": "PostalAddress",
    "addressLocality": "Fort Worth",
    "addressRegion": "TX",
    "addressCountry": "US"
  },
  "areaServed": [
    "Fort Worth", "Dallas", "Arlington", "Plano",
    "Frisco", "Denton", "McKinney", "Southlake"
  ],
  "parentOrganization": {
    "@type": "Organization",
    "name": "6th Ave Homes",
    "url": "https://6thavehomes.com"
  }
}

// FAQ schema (on resource pages with Q&A content)
{
  "@context": "https://schema.org",
  "@type": "FAQPage",
  "mainEntity": [
    {
      "@type": "Question",
      "name": "How much does a garage apartment cost in DFW?",
      "acceptedAnswer": {
```

```
      "@type": "Answer",
      "text": "Garage apartment costs in DFW range from $40,000–$100,000 for conversions, $80,000–$200,000 for above-garage apartments, and $100,000–$300,000+ for detached ADUs."
    }
  }
]
}
```

// Service schema (on service pages)

```
{
  "@context": "https://schema.org",
  "@type": "Service",
  "serviceType": "Garage Apartment Construction",
  "provider": {
    "@type": "HomeAndConstructionBusiness",
    "name": "DFW Garage Apartments"
  },
  "areaServed": {
    "@type": "Place",
    "name": "Dallas–Fort Worth, TX"
  }
}
```

Sitemap: Auto-generate XML sitemap and submit to Google Search Console immediately after launch.

Robots.txt: Standard — allow all crawling, reference sitemap location.

Canonical URLs: Set on every page to prevent duplicate content issues.

Internal Linking Strategy: - Every resource page links to relevant service pages and city pages - Every city page links to relevant resource pages and services - Every service page links to related city pages and the cost guide - Homepage links to everything - Breadcrumb navigation on all inner pages

Image SEO: - Descriptive file names: fort-worth-garage-conversion-project.webp not IMG_4521.webp - Alt text includes city + project type on every image - Compress to <200KB per image - Use WebP format with JPEG fallback

Page Speed: - Server-side rendering or static generation for all pages - CDN for static assets - Font optimization (limit to 2 font families) - Critical CSS inlining

Mobile: - Mobile-first design (60%+ of local search traffic is mobile) - Touch-friendly CTAs (minimum 44x44px tap targets) - No horizontal scrolling - Phone number clickable on mobile

Google Business Profile: - Create or link a Google Business Profile for DFW Garage Apartments - Ensure NAP (Name, Address, Phone) consistency across the site and GBP - Request reviews after project completion

Analytics: - Google Analytics 4 - Google Search Console - Track: form submissions, phone clicks, CTA clicks, page-level engagement - Set up conversion goals for consultation requests

---

CONVERSION OPTIMIZATION (CRO)

The site's job is to generate leads. Every design decision should serve that. Here's what's missing from the current wireframe that will meaningfully impact conversion rate:

Multi-Step Contact Form

Replace the single long form with a 3-step guided form. Multi-step forms convert 2-3x better than long single-step forms. Each step feels low-commitment. By the time someone hits step 3, they've already invested effort and are more likely to complete.

Step 1: "What kind of project are you thinking about?" 4 visual cards to click: Garage Conversion | Above-Garage Apartment | Detached ADU | Not Sure Yet *(No fields to fill — just a click. Lowest possible friction.)*

Step 2: "Tell us a little more" - What city is your property in? (dropdown) - What do you want to use the space for? (dropdown: Rental Income, Family, Guest Space, Home Office, Not Sure) - When are you hoping to get started? (dropdown: ASAP, 1-3 months, 3-6 months, Just Exploring)

Step 3: "Where should we send your project info?" - Name - Email - Phone - Property Address (optional) - Anything else? (optional textarea)

Submit button: "Get My Free Consultation"

This form should appear on the /contact/ page AND be embeddable as a popup or slide-in triggered by CTAs throughout the site.

Sticky Mobile CTA

On mobile, implement a sticky bottom bar that stays visible as users scroll:

[Call Now] [Free Consultation]

This bar should appear after the user scrolls past the hero section. It ensures there's always a conversion path within thumb reach.

Exit-Intent Popup (Desktop Only)

When a user moves their cursor toward the browser's close/back button, trigger a popup with the lead magnet:

"Before you go — grab our free guide: What Every DFW Homeowner Should Know Before Building a Garage Apartment" [Email field] [Download Now]

Rules: - Only fires once per session - Doesn't fire if user has already submitted a form - Desktop only (exit-intent doesn't work on mobile) - Clean design, not spammy — match site branding

Testimonials / Social Proof (Missing from Homepage)

The homepage has a Projects section but no actual testimonials. Add a dedicated testimonial section between Projects and Areas We Serve:

H2: What Our Clients Say

3 testimonial cards, each with: - Pull quote (1-2 sentences) - Client first name and city - Star rating (visual) - Project type

Aggregate review badge: "4.9 stars from 120+ Google Reviews" with link to Google Business Profile

(If you don't have garage-apartment-specific testimonials yet, use 6th Ave Homes construction testimonials — they're the same team.)

Phone Number Strategy

- Use a **tracked phone number** (Google forwarding number or CallRail) on the website so you can attribute calls to specific pages
- Display phone number in the header (desktop) and make it click-to-call on mobile
- Include phone number on every page in the footer
- On the contact page, make the phone number prominent — not buried below the form

---

INTERACTIVE COST CALCULATOR

This is the single biggest competitive differentiator available. No DFW competitor has one. National ADU companies (Villa, Abodu) have them and they're massive engagement and link magnets.

Spec:

URL: /cost-calculator/ (also link from the Resources dropdown) **Title Tag:** Garage Apartment Cost Calculator | Estimate Your DFW Project **H1:** Estimate Your Garage Apartment Cost

How it works: User answers 5-6 questions, gets an instant ballpark estimate.

Inputs: 1. Project type: Garage Conversion | Above-Garage Apartment | Detached ADU | Guest House 2. Approximate size: Under 400 sq ft | 400-600 sq ft | 600-800 sq ft | 800-1,000 sq ft | 1,000+ sq ft 3. City: Fort Worth | Dallas | Plano | Frisco | Denton | Other DFW 4. Finish level: Standard | Mid-Range | Premium 5. Plumbing needs: Full kitchen + bath | Kitchenette + bath | Bath only | None

Output: "Based on your selections, a typical [project type] in [city] runs **$X – $Y**."

Below the estimate: - “Want a more precise number? Schedule a free site visit and we’ll walk your property.” - [Schedule Consultation CTA] - [Email capture: “Send me this estimate” — captures lead even if they don’t book]

SEO value: Interactive tools get linked to by bloggers, journalists, and other websites. They also dramatically increase time-on-page and reduce bounce rate — both signals Google cares about. The page itself targets “garage apartment cost calculator” and “ADU cost estimator DFW.”

Technical note for Replit: This is a client-side JavaScript calculator — no backend needed. The cost ranges can be hardcoded based on your real pricing data. It’s a simple conditional logic tool, not a full API.

GOOGLE BUSINESS PROFILE STRATEGY

For local SEO, your Google Business Profile (GBP) may drive more leads than the website itself. Here’s the full strategy:

Setup

- **Business name:** DFW Garage Apartments (powered by 6th Ave Homes)
- **Primary category:** Home Builder
- **Secondary categories:** General Contractor, Remodeler, Construction Company
- **Service area:** Dallas–Fort Worth metro (list all cities you serve)
- **Description:** Include primary keywords naturally: “DFW Garage Apartments designs and builds garage apartments, ADUs, and guest houses across Dallas–Fort Worth. One team handles design, permitting, and construction from start to finish. Powered by 6th Ave Homes.”
- **Photos:** Upload project photos (before/after), team photos, in-progress shots. Google rewards active GBP profiles with more visibility.

NAP Consistency (Critical)

NAP = Name, Address, Phone. These must be IDENTICAL everywhere: - Website footer - Google Business Profile - Yelp listing - Facebook page - Any directory listings (Houzz, HomeAdvisor, BBB, etc.)

Even small inconsistencies (e.g., “Fort Worth” vs “Ft. Worth” vs “Ft Worth”) can hurt local rankings.

Review Strategy

Reviews are the #1 factor in local pack rankings. Target: 50+ reviews in the first 6 months.

- Ask every consultation lead for a review (even if they don’t convert)
- Ask every completed project client for a review
- Make it easy: send a direct link to the Google review form

- Respond to every review (positive and negative) — Google rewards engagement
- Pull the best reviews onto the website as testimonials

GBP Posts

Publish GBP posts weekly: - Project completion photos - Tips and advice (repurpose from resource pages) - Before/after transformations - Texas ADU legislation updates (SB 673 died in 2025, but expected reintroduction in 2027) - Seasonal content ("Spring is the best time to start your garage apartment project — here's why")

Google Maps Embed

Embed a Google Map on the contact page showing your Fort Worth service area. This is a local SEO signal and helps Google associate your site with your physical location.

BACKLINK ACQUISITION STRATEGY

Backlinks are still the #1 ranking factor. The wireframe was missing this entirely. Here's the plan:

Tier 1: Easy Wins (Month 1-2)

Directory listings: Submit to Houzz, HomeAdvisor, Thumbtack, Yelp, BBB, Angi, Porch. These create foundational backlinks and citation consistency.

6th Ave Homes cross-link: The main 6thavehomes.com site should link to dfwgarageapartments.com from its construction services page. This passes authority from an established domain.

Social profiles: Create profiles on Facebook, Instagram, Pinterest (garage apartment inspiration boards), YouTube. Each profile links back to the site.

Tier 2: Content-Driven Links (Month 3-6)

The cost calculator and zoning guide are link magnets. Once published, pitch them to: - Local real estate bloggers and agents (they'll link to the zoning guide as a resource) - Personal finance blogs covering real estate investing - Local news outlets covering housing affordability and ADU legislation

Guest posts: Write for local Fort Worth publications (FW Weekly, Fort Worth Magazine, DFW-specific real estate blogs) about the ADU trend in DFW, the legislative push for statewide ADU rights, etc. Each guest post includes a link back to the site.

HARO / Connectively: Register as a source for journalists writing about ADUs, housing, construction in Texas. When you're quoted, you get a backlink from a high-authority news site.

Tier 3: PR and Partnerships (Month 6+)

Local press: Pitch the ADU story angle to local news — "Why DFW homeowners are adding backyard apartments — and what the law says about it" with DFW Garage Apartments as the expert source. When ADU legislation resurfaces in the 2027 session, pitch again with the "here's what it would change" angle.

Real estate agent partnerships: Create a co-branded resource for real estate agents: "The Agent's Guide to ADUs in DFW" — they share it with clients, driving backlinks and referral traffic.

Community partnerships: Sponsor or speak at local homeowner association meetings, neighborhood planning meetings, etc. about ADU options. These events often get linked from .org and .gov sites.

Chamber of Commerce: Fort Worth Chamber membership creates a .org backlink and local authority signal.

Link Building KPI

Target: 10-15 new referring domains per month for the first 6 months. Monitor via Ahrefs or SEMrush.

BLOG STRATEGY (LAUNCH WITH THE SITE)

Don't wait until month 5-6 to add a blog. Launch with 4-6 initial posts and publish 2-4 per month ongoing. Each post targets a long-tail keyword and funnels to a service or resource page.

URL Structure: /blog/[slug]/

Launch Posts (Publish with site):

1. **"Can I Build a Garage Apartment on My Property in DFW?"** (1,200 words) Target: "can I build garage apartment" + city variants Links to: Zoning Guide, city pages

2. **"5 Things We Wish Every Homeowner Knew Before Building a Garage Apartment"** (1,000 words) Target: "building garage apartment tips," "garage apartment mistakes" Links to: Process page, Cost Guide

3. **"Texas Tried to Legalize ADUs Statewide — Here's What Happened and What's Next"** (1,500 words) Target: "Texas ADU law," "SB 673 Texas," "can I build ADU Texas" Links to: Texas ADU Laws resource page, city pages

4. **"Garage Conversion vs. New Build: How to Decide"** (1,200 words) Target: "garage conversion vs new build," "should I convert garage" Links to: Garage Conversion service page, Comparison resource page

Ongoing Post Ideas (2-4/month):

- "What [City] Homeowners Need to Know About ADU Zoning" (one per city — recurring series)
- "How Much Rental Income Can a Garage Apartment Generate in [City]?" (per city)
- Project spotlights: "A 600 Sq Ft Garage Apartment in Fairmount: From Empty Garage to $1,800/Month"
- "The Best Garage Apartment Floor Plans for Small Lots"
- "How to Finance a Garage Apartment Without a Construction Loan"
- "What Does the Permit Process Look Like in [City]?"
- "Above-Garage vs. Beside-Garage: Pros and Cons"
- "Designing a Garage Apartment for Aging Parents: Accessibility Tips"
- "Should You Airbnb or Long-Term Rent Your Garage Apartment in DFW?"
- "How a Garage Apartment Affects Your Property Taxes in Texas"

Blog SEO Rules for Replit:

- Every blog post needs a unique title tag, meta description, and H1
- Include 2-3 internal links per post (to service pages, resource pages, or city pages)
- Include a CTA at the bottom of every post (consultation or lead magnet)
- Add author schema (Jamey Ice or 6th Ave Homes team) for E-E-A-T
- Implement "Related Posts" at the bottom of each post to increase pageviews
- Blog posts should have a table of contents for posts over 1,000 words (improves UX and creates jump links that Google can show in search results)

REVIEW GENERATION STRATEGY

Reviews directly impact both local SEO rankings and conversion rate. People don't hire construction companies without reading reviews.

Where to Generate Reviews

1. **Google Business Profile** — #1 priority. This is what shows in local search.
2. **Houzz** — Strong for construction/renovation searches
3. **Yelp** — Secondary but important for credibility

How to Generate Reviews

- After every completed consultation (even if they don't proceed): "We'd love your feedback on the consultation experience. Would you mind leaving us a quick Google review?"
- After every completed project: Send a personalized email with a direct link to the Google review page
- Follow up once (and only once) if they don't respond
- Make it dead simple — one click to the review form

On-Site Review Integration

- Embed Google Reviews widget on the homepage (auto-updates as new reviews come in)
- Pull best quotes for testimonials on service pages and city pages
- Add aggregate rating schema markup: "aggregateRating": { "@type": "AggregateRating", "ratingValue": "4.9", "reviewCount": "120" }

ADDITIONAL TECHNICAL SEO SPECS (MISSING FROM ORIGINAL)

URL Structure Rules

- All lowercase
- Hyphens between words (never underscores)
- Trailing slash on all URLs (be consistent — either always or never, Replit must pick one)
- No dates in URLs (URLs should be evergreen)
- Keep URLs short and descriptive: /resources/garage-apartment-cost-dfw/ not /resources/2026-complete-guide-to-how-much-a-garage-apartment-costs-in-dallas-fort-worth-texas/

Open Graph and Social Sharing Tags

Every page needs OG tags for when resources get shared on social media:

```
<meta property="og:title" content="[Page Title]" />
<meta property="og:description" content="[Meta Description]" />
<meta property="og:image" content="[High-quality image — 1200x630px]" />
<meta property="og:url" content="[Canonical URL]" />
<meta property="og:type" content="website" />
<meta name="twitter:card" content="summary_large_image" />
```

Create a default OG image (branded — DFW Garage Apartments logo on a project photo background) for pages without a specific image.

Breadcrumb Navigation + Schema

Every inner page should have breadcrumbs: Home > Services > Garage Conversions
Home > Areas > Fort Worth Home > Resources > Cost Guide

Implement BreadcrumbList schema:

```
{
  "@context": "https://schema.org",
  "@type": "BreadcrumbList",
  "itemListElement": [
    { "@type": "ListItem", "position": 1, "name": "Home", "item":
"https://dfwgarageapartments.com/" },
    { "@type": "ListItem", "position": 2, "name": "Areas", "item":
"https://dfwgarageapartments.com/areas/" },
```

{ "@type": "ListItem", "position": 3, "name": "Fort Worth", "item": "https://dfwgarageapartments.com/areas/fort-worth/" }
]
}

404 Page

Custom 404 page that keeps users on the site: - “This page doesn’t exist — but your garage apartment could.” - Links to: Homepage, Services, Cost Calculator, Contact - Search bar (optional) - Same nav and footer as rest of site

Call Tracking

- Use CallRail or Google forwarding number to track which pages generate phone calls
- Assign different tracking numbers to different traffic sources (organic, paid, direct) if you ever run ads
- Track call duration to distinguish real leads from tire-kickers

Core Web Vitals Targets (Specific)

- **LCP (Largest Contentful Paint):** < 2.5 seconds
- **FID (First Input Delay):** < 100ms
- **CLS (Cumulative Layout Shift):** < 0.1
- **TTFB (Time to First Byte):** < 600ms

These are measurable in Google PageSpeed Insights and directly impact rankings.

SSL Certificate

Must be HTTPS. No exceptions. Replit handles this automatically with custom domains, but verify after setup.

Indexing Strategy (Post-Launch)

1. Submit XML sitemap to Google Search Console immediately
2. Manually request indexing for the 5 most important pages (homepage, cost guide, zoning guide, Fort Worth city page, Texas ADU Laws page)
3. Monitor “Coverage” report in Search Console for any crawl errors
4. Fetch and render key pages to verify Google sees the full content (especially important with JavaScript frameworks)

CONTENT CALENDAR — POST-LAUNCH

After the initial site is built with the pages above, add content on a regular cadence to build topical authority:

Month 1-2: - Publish all 8 city pages - Publish all 6 resource guides - Submit sitemap to Google Search Console - Set up Google Business Profile

Month 3-4: - Add 2-3 more city pages (Keller, Grapevine, Mansfield, Weatherford) - Add 2 new resource guides (e.g., "Best Garage Apartment Floor Plans for Small Lots," "What to Ask Before Hiring a Garage Apartment Builder") - Begin adding project pages as builds are completed

Month 5-6: - Add FAQ content to service pages (target "People Also Ask" featured snippets) - Refresh Texas ADU Laws page (monitor 2027 session for new legislation) - Add neighborhood-specific content within city pages - Publish 8-12 additional blog posts (the blog launched with the site — keep the cadence going at 2-4/month)

Ongoing: - Update cost data annually (keep the "(2026 Guide)" date current) - Add new project pages as they're completed - Monitor Search Console for new keyword opportunities - Build backlinks through local press, partnerships, and guest content

---

DESIGN DIRECTION FOR REPLIT

Visual Identity: - Clean, modern, professional — NOT contractor-website-generic - Think: Airbnb for construction. Clean lines, lots of white space, beautiful project photography - Navy + warm accent (borrow from 6th Ave Homes palette — navy, coral/salmon, white) - "Powered by 6th Ave Homes" in nav and footer, but the site's identity is DFW Garage Apartments

Typography: - Sans-serif primary (clean, modern — something like Inter, DM Sans, or similar) - Consider a serif accent for H1s (gives it warmth, sets it apart from generic contractor sites)

Photography: - Heavily photo-driven — project photos are the #1 trust signal - Avoid stock photos of generic construction. Use real 6AH project photos. - Before/after comparisons are extremely effective - Lifestyle shots of people using the spaces (not just empty rooms)

Layout Principles (from StorySite philosophy): - No large blocks of text on conversion pages — keep paragraphs to 2-3 sentences - Resource/guide pages can be longer (that's expected and valued by Google) - CTAs on every section — never make someone scroll to find the next step - Mobile-first — design for phone screens first, then scale up - White space is not wasted space — it creates clarity

CTA Design: - Primary CTA: Solid button (coral/salmon on navy background or navy on light background) - Button text always action-oriented: "Schedule a Consultation," "Start Your Project," "Download the Free Guide" - Sticky header CTA on scroll (especially mobile)

DOMAIN STRATEGY

Domains owned (all active, registered through Squarespace, expire Feb 2027):

1. **dfwgarageapartments.com** — PRIMARY DOMAIN. Build the site here. All authority flows here.

2. **dfwgarageapts.com** — 301 redirect to dfwgarageapartments.com. This catches anyone who abbreviates "apartments" to "apts" in the URL bar. Pure defensive play.

3. **fwgarageapartments.com** — 301 redirect to dfwgarageapartments.com/areas/fort-worth/. This sends Fort Worth-specific type-in traffic directly to the Fort Worth city page, which is both a better user experience and a signal to Google that the Fort Worth page is important. (Alternative: redirect to homepage. Either works, but the city page redirect is slightly smarter for SEO.)

4. **garageapts.com** — This is the interesting one. It's a short, category-level domain that could have national value someday. For now, 301 redirect to dfwgarageapartments.com. But keep this in your back pocket — if the DFW site works and you want to expand to Austin/Houston/San Antonio, garageapts.com could become the parent brand with city-specific subdomains (dfw.garageapts.com, atx.garageapts.com) or a national directory/resource site. Don't build anything on it yet. Just let it funnel authority to the primary domain.

The rule: Do NOT build separate sites for each domain. One strong site beats four weak ones every time. Consolidate all domain authority into dfwgarageapartments.com. The other three domains exist purely as redirects that capture type-in traffic and prevent competitors from registering them.

Implementation in Squarespace: Set up 301 redirects (permanent, not 302/temporary) from each secondary domain to the appropriate URL on the primary domain. If you're moving the site to Replit/custom hosting, configure the redirects at the DNS or server level.

LEAD MAGNET SPEC

Title: "The DFW Garage Apartment Guide: What Every Homeowner Should Know Before Building"

Format: PDF, 8-12 pages, professionally designed (match site branding)

Contents: 1. Is a garage apartment right for your property? (Quick self-assessment) 2. The 4 types of garage apartments (with pros/cons) 3. Real cost ranges for DFW (2026 numbers) 4. Zoning snapshot: What's allowed in your city 5. The 5 questions to ask any builder before you hire them 6. Timeline: What to expect from start to finish 7. Next step: How to schedule a consultation

Delivery: Email capture → immediate PDF download + entry into nurture email sequence

SEO Value: The lead magnet itself doesn't rank, but the landing page for it does. And the email list it builds creates a retargeting audience for future content.

Email Nurture Sequence (Post-Download)

Don't let leads go cold. After someone downloads the guide, trigger a 5-email sequence over 14 days:

Email 1 (Immediate): Guide delivery + "Here's what most people do next" **Email 2 (Day 3):** "The #1 mistake homeowners make with garage apartments" → links to a blog post or resource page **Email 3 (Day 6):** Project spotlight — before/after of a real DFW project with a short story **Email 4 (Day 10):** "How much would it cost for YOUR property?" → CTA to schedule consultation or use cost calculator **Email 5 (Day 14):** "Ready when you are" — soft close, restate the value of a free consultation, include phone number

Tool: Mailchimp, ConvertKit, or whatever 6AH already uses. The key is that it's automated — set it once and every lead gets nurtured.

REPLIT BUILD SPECIFICATION

This section gives Replit (or any AI code agent) the exact technical details needed to build without guessing.

Design Tokens (Exact Values)

Colors:

--color-navy: #1B2A4A (primary brand, headers, footer background, dark sections)
--color-navy-light: #2C3E6B (hover states, secondary backgrounds)
--color-coral: #E8725A (primary CTA buttons, accent elements, highlights)
--color-coral-hover: #D4613E (CTA hover state)
--color-white: #FFFFFF (page backgrounds, card backgrounds)
--color-off-white: #F7F5F2 (alternating section backgrounds, subtle contrast)
--color-warm-gray: #6B6560 (body text)
--color-dark: #1A1A1A (headings, strong text)
--color-light-gray: #E5E2DF (borders, dividers, input borders)
--color-success: #4CAF50 (form success states)
--color-error: #D32F2F (form error states)

Typography:

--font-primary: 'DM Sans', sans-serif (body text, UI elements, navigation)
--font-heading: 'Playfair Display', serif (H1s only — gives warmth, distinguishes from generic contractor sites)
--font-mono: 'JetBrains Mono', monospace (cost calculator output numbers only)

--font-size-h1: clamp(2rem, 4vw, 3.5rem)
--font-size-h2: clamp(1.5rem, 3vw, 2.25rem)
--font-size-h3: clamp(1.25rem, 2.5vw, 1.75rem)
--font-size-body: 1rem (16px)

--font-size-small: 0.875rem (14px)

--line-height-body: 1.7
--line-height-heading: 1.2

Spacing:

--space-section: clamp(4rem, 8vw, 8rem) (vertical space between page sections)
--space-component: clamp(2rem, 4vw, 4rem) (space between components within a section)
--space-element: 1rem (space between related elements)
--container-max: 1200px (max content width)
--container-padding: clamp(1rem, 4vw, 2rem) (horizontal page padding)

Shadows & Borders:

--shadow-card: 0 2px 8px rgba(0,0,0,0.08)
--shadow-card-hover: 0 4px 16px rgba(0,0,0,0.12)
--shadow-dropdown: 0 4px 12px rgba(0,0,0,0.15)
--radius-card: 12px
--radius-button: 8px
--radius-input: 6px

Responsive Breakpoints

--bp-mobile: 0 – 639px (single column, hamburger nav, stacked cards)
--bp-tablet: 640px – 1023px (2-column grids, condensed nav)
--bp-desktop: 1024px – 1439px (full layout, all features visible)
--bp-wide: 1440px+ (max-width container, centered)

Reusable Component Library

Replit should build these as reusable components and use them across all pages:

1. <NavBar /> - Desktop: Logo left, nav links center, “Schedule a Consultation” CTA button right - Dropdown menus on “Areas We Serve” (list all cities) and “Resources” (list all guides) — triggered by hover on desktop, tap on mobile - Mobile: Logo left, hamburger icon right → full-screen slide-out menu with all links - Sticky on scroll: after scrolling past hero, nav becomes fixed with subtle shadow - Active page indicator: underline on current page link

2. <HeroSection title, subtitle, body, primaryCTA, secondaryCTA, backgroundImage /> - Full-width section with background image (darkened overlay for text readability) - H1, subheading, body text, two CTA buttons (primary filled, secondary outlined) - Mobile: stack CTAs vertically, reduce image overlay

3. <ServiceCard image, title, description, link /> - Card with image top, title, short description, “Learn More →” link - Hover: subtle lift (shadow transition) - Used on: homepage, services index page

4. <CityCard cityName, tagline, link /> - Compact card with city name and one-liner - Used on: homepage Areas section, areas index page

5. <FAQAccordion items=[{question, answer}] /> - Expandable accordion — one question visible at a time (click to expand/collapse) - Plus/minus icon toggle - Implement FAQPage JSON-LD schema automatically from the items array - Used on: every service page, every city page

6. <TestimonialCard quote, name, city, projectType, rating /> - Pull quote with star rating visual, client first name + city, project type - Used on: homepage, can be reused on service/city pages

7. <CTABanner heading, body, buttonText, buttonLink, variant="dark|light" /> - Full-width call-to-action section. Dark variant: navy bg, white text. Light variant: off-white bg, navy text. - Used between sections on every page

8. <MultiStepForm /> - 3-step form as specified in CRO section - Progress indicator (Step 1 of 3 / Step 2 of 3 / Step 3 of 3) - Animated slide transition between steps - Form state preserved as user navigates back/forward between steps - Submit sends data via POST to form endpoint (see Form Handling below) - Used on: /contact/ page AND as a modal triggered by CTA buttons site-wide

9. <CostCalculator /> - Client-side JavaScript calculator as specified in the Cost Calculator section - No backend needed — pricing logic in a JSON config (see below) - Animated result reveal - “Email me this estimate” capture field below result

10. <ProjectCard image, city, projectType, size, link /> - Image with overlay text (city + project type) - Used on: homepage projects section, projects index, related projects

11. <BlogPostCard image, title, excerpt, date, category, link /> - Used on: blog index, related posts, homepage (optional)

12. <StickyMobileCTA /> - Fixed bottom bar on mobile only. Appears after scrolling past hero. - Two buttons: “ Call Now” (click-to-call) and “ Free Consultation” (opens MultiStepForm modal) - Z-index above all content, subtle top border

13. <ExitIntentPopup /> - Desktop only. Fires when cursor moves above viewport. - Lead magnet offer + email capture field - Only fires once per session (use cookie/sessionStorage) - Does not fire if user has already submitted a form (check form submission state)

14. <BreadcrumbNav items=[{name, url}] /> - Renders breadcrumb trail with “>” separator - Auto-generates BreadcrumbList JSON-LD schema from items array

15. <TableOfContents headings /> - Auto-generated from H2 elements on the page - Sticky sidebar on desktop (scrolls with content) - Collapsible dropdown at top of content on mobile - Smooth scroll on click - Used on: blog posts >1000 words, resource/guide pages

Data Model

Projects (stored as Markdown files in /content/projects/):

```
---
title: "Fairmount Garage Conversion"
slug: "fairmount-garage-conversion"
city: "Fort Worth"
neighborhood: "Fairmount"
projectType: "garage-conversion"  // garage-conversion | above-garage | detached-adu | guest-house
size: 600
year: 2025
timeline: "4 months"
images: ["hero.webp", "kitchen.webp", "exterior.webp", "before.webp"]
featured: true
excerpt: "A 600 sq ft garage conversion in the heart of Fairmount..."
---

[Long-form project story in Markdown]
```

Blog Posts (stored as Markdown files in /content/blog/):

```
---
title: "Can I Build a Garage Apartment on My Property in DFW?"
slug: "can-i-build-garage-apartment-dfw"
date: "2026-04-01"
author: "Jamey Ice"
category: "zoning"  // zoning | costs | projects | tips | legislation
excerpt: "First 150 characters for blog index cards..."
featuredImage: "blog-hero.webp"
---

[Blog post body in Markdown]
```

Cost Calculator Pricing Config (stored as /data/calculator-config.json):

```
{
  "baseRanges": {
    "garage-conversion": { "min": 40000, "max": 100000 },
    "above-garage": { "min": 80000, "max": 200000 },
    "detached-adu": { "min": 100000, "max": 300000 },
    "guest-house": { "min": 80000, "max": 250000 }
  },
  "sizeMultipliers": {
    "under-400": 0.7,
    "400-600": 0.85,
    "600-800": 1.0,
    "800-1000": 1.15,
    "1000-plus": 1.35
  },
```

```
  "finishMultipliers": {
    "standard": 0.85,
    "mid-range": 1.0,
    "premium": 1.3
  },
  "plumbingAdders": {
    "full-kitchen-bath": 0,
    "kitchenette-bath": -5000,
    "bath-only": -15000,
    "none": -25000
  },
  "cityMultipliers": {
    "fort-worth": 1.0,
    "dallas": 1.05,
    "plano": 1.1,
    "frisco": 1.1,
    "southlake": 1.2,
    "denton": 0.95,
    "arlington": 1.0,
    "mckinney": 1.05,
    "other": 1.0
  }
}
```

Calculator logic: finalMin = baseMin × sizeMultiplier × finishMultiplier × cityMultiplier + plumbingAdder (same for max). Round to nearest $5,000.

Form Handling

Option A (Recommended — simplest for Replit): Use Formspree or Formspark. Create a form endpoint, POST form data to it, and it forwards to jamey@6thavehomes.com. No backend code needed.

Option B: If Replit uses Next.js with API routes, create a /api/contact endpoint that sends email via SendGrid or Resend. Store submissions in a JSON file or simple database.

Form submissions should include: - All form field values - Page the user was on when they clicked the CTA (referral source) - UTM parameters if present in the URL - Timestamp

Lead magnet delivery: After email capture on the lead magnet form, trigger an automated email with PDF download link. Use Mailchimp, ConvertKit, or the email service 6AH already uses. Replit just needs to POST the email address to the email service's API.

Navigation Dropdown Behavior

- **Desktop:** Hover to open dropdown (200ms delay before close to prevent accidental close). Click on parent link goes to index page (/services/ or /areas/).
- **Mobile:** Tap parent to expand submenu (accordion-style within hamburger menu). Tap parent again or tap a child link to navigate.
- **Dropdown animation:** Fade-in + slight slide-down (150ms ease-out)

Image Handling

- All images served as WebP with JPEG fallback (<picture> element)
- Lazy loading on all images below the fold (loading="lazy")
- Responsive images with srcset for 640w, 1024w, 1440w variants
- Max file size: 200KB per image after compression
- Hero images: 1440x600px (desktop), 640x400px (mobile crop)
- Project gallery images: 1200x800px
- Blog featured images: 1200x630px (matches OG image spec)
- Service/city card images: 600x400px

Structured Data: AggregateRating Schema

Add to the LocalBusiness schema (site-wide):

```
"aggregateRating": {
  "@type": "AggregateRating",
  "ratingValue": "4.9",
  "reviewCount": "120",
  "bestRating": "5"
}
```

Update reviewCount as new Google reviews come in. This enables star ratings in search results.

Google Reviews Widget

Use Elfsight Google Reviews or ReviewsOnMyWebsite — both provide embed widgets that auto-pull from your Google Business Profile. Embed on homepage testimonials section. No custom API integration needed.

301 Redirect Implementation

If hosting on Replit with a custom domain, configure redirects in next.config.js (Next.js) or equivalent:

```
// next.config.js
async redirects() {
  return [
    { source: '/:path*', has: [{ type: 'host', value: 'dfwgarageapts.com' }],
destination: 'https://dfwgarageapartments.com/:path*', permanent: true },
    { source: '/:path*', has: [{ type: 'host', value: 'garageapts.com' }], destination:
'https://dfwgarageapartments.com/:path*', permanent: true },
    { source: '/:path*', has: [{ type: 'host', value: 'fwgarageapartments.com' }],
destination: 'https://dfwgarageapartments.com/areas/fort-worth/', permanent: true
},
  ]
}
```

If DNS-level redirects are available (Squarespace, Cloudflare), configure there instead — faster and doesn't require the app to handle the redirect.

PHASED REPLIT BUILD PLAN

You should NOT hand this entire document to Replit at once. It's ~2,000 lines. AI code agents work best with focused, scoped instructions. Here's how to break it into 4 phases:

PHASE 1: Foundation + Core Pages (Week 1)

Hand Replit: The Strategic Overview, Site Architecture, Design Tokens, Responsive Breakpoints, Component Library (all 15 components), Navigation spec, and these pages: - Homepage (/) - Services Index (/services/) - Areas Index (/areas/) - Contact (/contact/) with Multi-Step Form - About (/about/) - 404 page

Also include: Technical SEO Specifications (structured data schemas, OG tags, sitemap generation, canonical URLs, breadcrumbs, URL structure rules), Design Direction section, and Form Handling spec.

What you get: A fully functional, responsive, SEO-configured site with the core conversion pages, reusable component library, and all the technical plumbing in place. This is the foundation everything else builds on.

Replit prompt for Phase 1:

"Build a modern, SEO-optimized Next.js website for dfwgarageapartments.com. It's a garage apartment and ADU construction company in DFW, powered by 6th Ave Homes. Start with the foundation: a reusable component library, the homepage, services index, areas index, contact page with a 3-step multi-step form, about page, and custom 404 page. The site must be server-side rendered, mobile-first (sticky mobile CTA bar, click-to-call), and have JSON-LD structured data on every page (LocalBusiness, BreadcrumbList). Here are the exact design tokens, components, and page wireframes…"

[Paste: Strategic Overview through Component Library, then Homepage through Contact page wireframes, then Technical SEO Specs, Design Direction, Form Handling, and Navigation Dropdown Behavior sections]

PHASE 2: Service Pages + Process Page (Week 2)

Hand Replit: All 4 service page wireframes (Garage Conversions, Above-Garage, Detached ADUs, Guest Houses) and the Process page. Include the FAQ Accordion component spec and FAQ schema markup instructions.

What you get: The full services layer with deep content, FAQ schema for featured snippets, and internal linking between service pages.

Replit prompt for Phase 2:

"Add 5 pages to the existing site: 4 service pages and a process page. Each service page uses the FAQAccordion component for FAQ sections with auto-generated FAQPage JSON-LD schema. Here are the complete wireframes with all copy, H-tags, meta descriptions, and internal linking instructions…"

[Paste: Pages 2-6 wireframes]

PHASE 3: City Pages + Resource Pages (Week 3)

Hand Replit: The city page template, all 8 city page content angles, all 6 resource/guide page wireframes, the Cost Calculator spec (including pricing config JSON), and the Areas index page updates.

What you get: The full SEO content layer — the pages that actually attract search traffic. The cost calculator as a competitive differentiator.

Replit prompt for Phase 3:

"Add 15+ pages: 8 city-specific landing pages, 6 resource guides, and an interactive cost calculator. The city pages follow a template structure — here's the template and the unique content angles for each city. The cost calculator is client-side JavaScript with pricing logic from a JSON config file. Here are all the wireframes, the calculator spec, and the pricing config…"

[Paste: City page template + all city content, Resource pages 15-20, Cost Calculator section, Calculator pricing config]

PHASE 4: Blog + Project Gallery + CRO Features (Week 4)

Hand Replit: Blog index page, blog post template, project page template, projects index page, exit-intent popup, Google Reviews widget embed, lead magnet email capture, and all CRO features.

What you get: The content engine (blog), social proof layer (projects + reviews), and conversion optimization features that maximize lead generation.

Replit prompt for Phase 4:

"Add the blog system (index page, post template with table of contents and related posts), project gallery (index page with filters, individual project pages), exit-intent popup for lead magnet capture, and Google Reviews widget embed. Here are the templates, data models, and feature specs…"

[Paste: Blog index + template, Project template, CRO section, Lead Magnet spec, Data Model for blog and projects]

POST-BUILD CHECKLIST

After all 4 phases, verify: - [ ] XML sitemap generates correctly and includes all pages - [ ] All JSON-LD structured data validates in Google's Rich Results Test - [ ] All pages pass Core Web Vitals (test in PageSpeed Insights) - [ ] Mobile experience is clean — test on actual phone - [ ] Multi-step form submits correctly and sends email - [ ] Cost calculator produces reasonable estimates for all input combinations - [ ] FAQ accordions expand/collapse correctly - [ ] 301 redirects work for all secondary domains - [ ] OG tags render correctly (test with Facebook Sharing Debugger and Twitter Card Validator) - [ ] All internal links work (no 404s) - [ ] Click-to-call works on mobile - [ ] Exit-intent popup fires correctly on desktop (once per session, not after form submission) - [ ] SSL certificate active (HTTPS) - [ ] Breadcrumbs display and schema validates on all inner pages - [ ] Blog post table of contents generates from H2s and smooth-scrolls - [ ] Image lazy loading works below the fold - [ ] All images are WebP with proper alt text

---

FULL DOCUMENT SUMMARY (FOR REFERENCE)

This document contains everything needed to build dfwgarageapartments.com across 4 phases:

- **Strategic Overview** — Market opportunity, domain advantage, two-layer strategy, legislative tailwind
- **Site Architecture** — Full sitemap (30+ pages), navigation structure
- **26 Page Wireframes** — Every page with H1, H2s, content outlines, meta tags, target keywords, internal links, CTAs
- **Technical SEO** — Structured data schemas (JSON-LD), OG tags, sitemap, robots.txt, canonical URLs, Core Web Vitals targets, image SEO, mobile optimization
- **Conversion Optimization** — Multi-step form, sticky mobile CTA, exit-intent popup, testimonials, phone tracking
- **Cost Calculator** — Full spec with pricing config and calculation logic
- **Replit Build Spec** — Design tokens (exact hex colors, fonts, spacing), 15 reusable components, responsive breakpoints, data models, form handling, navigation behavior, image handling, redirect implementation
- **Growth Strategy** — Google Business Profile, backlink acquisition, blog strategy, review generation, lead magnet, email nurture sequence, content calendar
